Let's understand with an example

35-years old Arnav (healthy male) is a Business Analyst who lives with his wife. He buys Platinum Wealth Builder Plan for a policy term of 20 years. He pays an annual premium of Rs. 5,00,000 for 10 years for which the Death Sum Assured is Rs. 50,00,000. The benefits under the plan will be as follows:

● Death Benefit

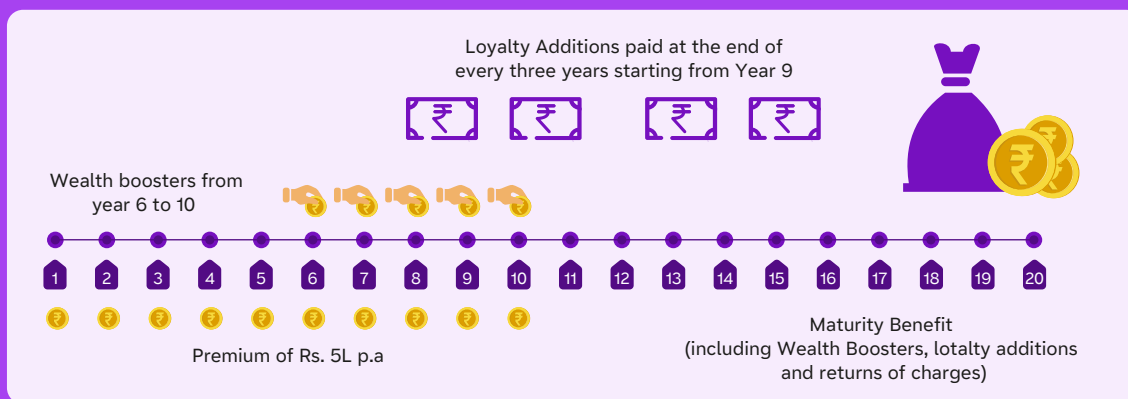

In case of unfortunate death at the end 13th policy year, Arnav's nominee will receive the Death Benefit, as per the table given below:

Projected investment returns	Wealth Boosters	Loyalty Additions	Death Benefit (Including Wealth Boosters and Loyalty Additions)
8%	50,000	80,000	83,44,242
4%	50,000	80,000	60,12,702

● Maturity Benefit

On survival till the maturity date, Arnav will receive the maturity benefit, as per the table given below:

Projected investment returns	Wealth Boosters	Loyalty Additions	Return of Charges	Maturity Benefit (Including Wealth Boosters, Loyalty Additions and Return of Charges)
8%	50,000	1,60,000	1,52,446	1,30,42,564
4%	50,000	1,60,000	1,56,551	73,20,290

This illustration is for a healthy 35 years old healthy male. Fund allocation is 100% in Equity Growth Fund. The above are illustrative values net of all charges, Goods & Services tax and cess as applicable. The benefit illustration is based on projected gross investment rates of returns at 4% and 8% respectively. These assumed rates of return are not guaranteed and they are not the upper or lower limits of what you might get back as the value of your policy is dependent on a number of factors including future investment performance.

Manage your investment

- **Self Managed Strategy:**
You may decide to invest in any of the funds (except discontinued policy fund) and change them from time to time, as per your wish. This option is suitable only if you know precisely where you wish to invest and you have the time & inclination to manage your investments from time to time.
- **Systematic Allocator:**
You may leave it to us to manage your investments by opting for Systematic Allocator. It is a programmed investment strategy where the fund mix becomes more conservative as the plan approaches maturity. It is a programmed investment strategy where the fund mix becomes more conservative as the plan approaches maturity. The funds will be invested in the Equity Growth fund (ULIF04111/01/08EQOPP135) and Bond Fund II (ULIF07731/10/17BOND2135) based on the residual time to maturity of the policy. This strategy moves the fund allocation towards Bond Fund II as the plan approaches the maturity date. However, by reducing exposure to Equity Growth fund, the risk of a sudden drop in the equity market affecting the accumulated value, diminishes.

Balance /Residual time to maturity (in years) of the plan is used to determine the proportion of allocation to the Equity Growth fund and Bond Fund II. This proportion is pre-defined by the Systemic Allocator "Glide Path". The premiums will be allocated as per this Glide Path and at each policy anniversary, the Fund Value will be rebalanced as per the residual maturity of the plan. "Glide Path" is the proportion allocated to the Equity Growth Fund and Bond Fund II based on the time remaining for the plan to attain maturity as shown in the table below, the premiums will be allocated and the Fund Value will be rebalanced at each policy anniversary as per Glide Path.

Systematic Allocator "Glide Path"		
Balance/Residual time to maturity of the plan (in years)	Proportion allocated to Equity Growth Fund	Proportion allocated to Bond Fund II
1	5.00%	95.00%
2	10.00%	90.00%
3	15.00%	85.00%
4	20.00%	80.00%
5	25.00%	75.00%
6	30.00%	70.00%
7	35.00%	65.00%
8	45.00%	55.00%
9	50.00%	50.00%
10	55.00%	45.00%
11	60.00%	40.00%
12	65.00%	35.00%
13	70.00%	30.00%

Units/ Net Asset Value

Each unit-linked fund is divided into number of units of equal value. The value of each unit is the Net Asset Value which we determine regularly. New units are created for cash inflows to the funds and units are realised to meet cash outflows. Cash inflows and outflows advised up to 3:00 pm are processed using that day's NAV, while those advised after 3:00 pm are processed using the following day's NAV.

Unit price (Net Asset Value) formula

The Net Asset Value (NAV) of each segregated fund shall be computed as

$$\text{NAV} = \frac{\text{Market Value of investments held by the fund} + \text{Value of current assets} - \text{Value of current liabilities \& provisions, if any}}{\text{Number of Units existing on valuation date (before creation/redemption of units)}}$$

Fund Management Charge is levied as a percentage of the value of assets and will be appropriated by adjusting the NAV on a daily basis. The uniform cut-off timings for applicability of net asset value in respect of allocations and redemptions will be 3:00 p.m. NAV and its calculation shall be in compliance with Computation of Net Asset Value (NAV) from IRDAI (Insurance Products) Regulations, 2024, as amended from time to time and any other relevant circulars/guidelines/regulations/directions from the IRDAI from time to time.

New Funds

We may offer you new unit-linked funds and also modify the existing ones; subject to necessary approvals as required by IRDAI. We may withdraw one or more unit-linked funds in future. However, you will be intimated in advance to select a new fund (or funds).

Default Funds

Although the Funds are open ended, we may, as per Board approved policy, and subject to necessary approvals as required by IRDAI, completely close any of the Funds on the happening of any event, which in our sole opinion requires the said Fund to be closed. The policyholder shall be given at least three months prior written notice of our intention to close any of the Funds completely or partially except in Force Majeure conditions, where we may give a shorter notice. In case of complete

closure of a Fund, on and from the date of such closure, we shall cease to issue and cancel units of the said Fund and cease to carry on activities in respect of the said Fund, except such acts as are required to complete the closure. In such an event if the units are not switched to another Fund by the policyholder, we will switch the said units to any other appropriate Fund with similar characteristics as per Board approved policy, with due weightage for the respective NAVs at the time of switching, subject to necessary approvals as required by the Regulator.

However, no fee would be charged by us for switching to another Fund or exiting from the policy in the event of complete closure of Funds.

We will inform you of changes to this range from time to time.

Foreclosure

After the lock-in period,

- 1) If the Fund Value of the policy becomes less than or equal to one annualized premium anytime, the policy shall be foreclosed.
- 2) Also at the beginning of each policy month, the company will estimate the Fund Value at the end of the month after deducting all prospective charges. If the estimated Fund Value is less than the Annualized Premium, the policy shall be foreclosed.

On foreclosure, Fund Value (if any) shall be payable and the policy shall terminate.
